

**Submission on 2025-26 notified prices ICP, February 2025**

**From: Gross, M.**

**Organisation: Key Energy & Resources**

Good afternoon,

I appreciate submissions closed in January. Key Energy is an energy consultancy that works with clients Australia wide assisting them to get the lowest electricity prices possible in a contestable market.

In SA the definition of large market is 160 MWh use per annum. Be excellent if the same applied in QLD so sites can have a choice between contracting with Ergon or going out on a dedicated contract.
